

Active eIDV

# Sovereign Identity Assurance

The Gold Standard for Digital Trust

## Authenticate. Authorize. Secure.

When trust is non-negotiable. By leveraging the user's own government-issued digital credentials, you achieve bank-grade assurance without the friction of manual document review. Shufti Active eIDV connects you to:

45+ trusted sovereign eIDs

30+ Territories

Global Dynamic eID Framework

Shufti's eIDV allows you to choose the right verification methods per country, enabling users to log in with their

BankID in Sweden

Singpass in Singapore

OneID in UK

Through a single integration.

Shufti Active eIDV delivers high-assurance, **sub-3-second verification** by allowing users to authenticate via trusted sovereign eIDs and bank logins, ensuring proof of possession and gold-standard compliance.

# Why Choose Active eIDV?

## Onboard in < 3 Seconds

Eliminate drop-offs with verification that happens instantly via trusted login flows.

## Verified Age Checks

Instantly validate "18+" status across 20+ territories directly from sovereign sources for maximum accuracy.

## Verified Address Checks

Confirm residency across 10+ territories, satisfying strict KYC mandates without utility bills.

## Sovereign Trust

Rely on government-vetted credentials (e.g., BankID, Singpass) rather than static data.

## Root of Possession

Users must authenticate on their device (FaceID/PIN), making account takeovers nearly impossible.

## Secure Re-Authentication

Use eIDs to authorize high-value transfers or password resets instantly.
