

VENDOR COMPARISON

Compare Identity Verification Providers Before You Decide

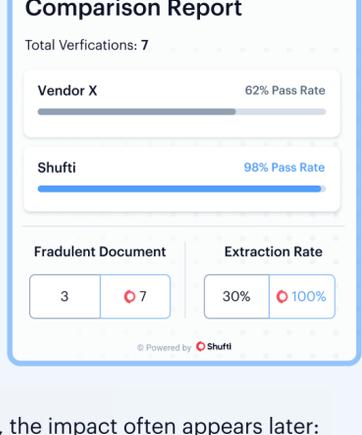

Make confident decisions with side-by-side performance data

Before selecting or switching identity verification providers, teams need evidence, not assumptions.

The provider you choose directly affects:

- Conversion Rates
- Fraud Exposure
- Compliance Posture
- Operational Cost

Yet traditional evaluation methods; demos, sales decks, and feature lists, rarely reflect how solutions perform on your real data.

When decisions are made without performance insight, the impact often appears later:

- Lost Revenue From Lower Approval Rates
- Unexpected Fraud Gaps
- Compliance Concerns
- Costly Rework After Go-Live

Testing before committing helps avoid those outcomes.

What This Comparison Helps You Do

Test **Shufti** alongside your **current** or **alternative provider** using real operational data so you can:

- Validate your existing provider with measurable, outcome-level evidence
- Assess Shufti under identical conditions before making a decision
- Identify meaningful performance differences prior to commitment
- Document results for procurement, compliance, and risk review

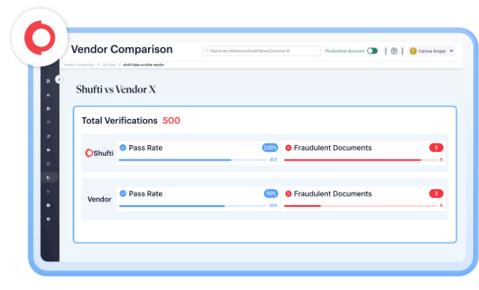

How the Vendor Comparison Tool Works

What You'll Learn

By benchmarking providers with your own data, you gain visibility into how each solution performs in practice, including:

- Legitimate user approval rates
- Fraud and risk signal detection
- Document data extraction accuracy
- Performance by document type or region
- Overall impact on onboarding efficiency

This helps you decide not just which provider looks strong, but which one best fits your business objectives.

Benefits At A Glance

Data-Driven

Understand how providers perform on your data, beyond marketing claims.

Fast Evaluation

One batch upload and comparison workflow, no lengthy pilots or integration cycles.

Risk-Controlled

Evaluate without disrupting your existing verification setup or live users.

Audit-Ready Results

Generate reports that support procurement, compliance, and executive alignment.

Run A Side-By-Side Comparison

Vendor selection shouldn't be a leap of faith. Testing verification providers with real data gives you clarity before investing time, budget, and engineering resources.

See how **Shufti** compares to your **current provider** before you decide.

Validate performance with your data and make your next identity verification decision with confidence.
